

Sacred Rounds

Singing rounds is fun, easy, educational and can be done anywhere! Rounds introduce choirs to ensemble singing in harmony, while keeping to their own lines. Most of these rounds will sound well with an adult choir or a children's choir. They can be used as warm-up exercises or to focus on a particular musical idea. They range from "easy" through "medium difficulty" to "challenging" and vary from two to six parts. Use them to focus on a vocal or musical element: intervals, rhythm, articulation, expression, legato, etc.

REHEARSAL TECHNIQUES

Begin by singing a round many times in unison until it is memorized. Divide the choir into two parts and when it sounds secure, add the other parts. Go back to unison singing and add the dynamics and other musical features. Then sing again in parts, aiming for accuracy of timing, pitch, diction, and expression. Sing the rounds unaccompanied. This helps a choir sing in tune, hear other singers and gain confidence, rather than relying on the accompaniment for support.

You may alter the speed and dynamics as you wish. Change the starting pitch if it feels too high or low.

These rounds can also be played on instruments with or without the singers. Percussion, finger snaps or claps can be added (see "musical features" index).

CHOIR DIRECTORS

When using rounds as warm-up exercises, ask the choir to focus on one vocal or musical aspect at a time. The same round may be used at various times to focus on different musical ideas. The key to singing rounds cleanly is to accurately keep the pulse and rhythm. As an extra challenge, stop beating time while the choir is singing and see how well they keep together! Also, try singing louder or softer with gradually controlled crescendos and diminuendos.

Divide your choir in different ways to vary the complexity of the exercise. For example, in a four-part round:

- a) Divide into four voice parts: Soprano, Tenor, Alto, Bass
- b) Mix up women and men into four equal sections
- c) Give each choir member a number (1, 2, 3, 4...) and get them to keep to their line while those around them are singing theirs.

Choose no more than one or two rounds at a time, aiming to make them sound as musical as you can. Use the "musical features" index to select aspects of singing you want the choir to focus on.

ENDING THE ROUNDS

Decide how many times the round is to be sung and whether the voices are going to finish separately or together on a chord, at a signal from you, on whatever note they have reached. (*e.g.*, in round 19 all parts can stop on measure 4 making a chord of B major). A fermata is placed over a note when the suggested end is in the middle of a round (*e.g.*, rounds 13, 20).

MUSIC TEACHERS

These rounds can be used to teach a particular musical characteristic (see "musical features" index). Singing rather than just listening will improve students' learning curve.

Although these SACRED ROUNDS are not for liturgical use, there is a seasonal index to help the choir focus on a particular season.

Have Fun!
